

General Feedback

Good morning all,

The neatness of handwriting and letter sizing should start from name, date and time and please model write and show the children how you want it to be.

It's ok to spend some time training them on the same or ask for my help when you're unable to, I will show them the expectation. You can write the date and time in the side and ask them to copy it, but please don't write it for them.

Ryan and Krishna had left small notes and feedback in the CW sheet which was really useful for me while reviewing. Greatly appreciate it.

We have many prep students in 7A and please review rainbow words with them verbally and also do the spelling test of red words today. Kindly follow this consistently as I have promised the parents of the same.

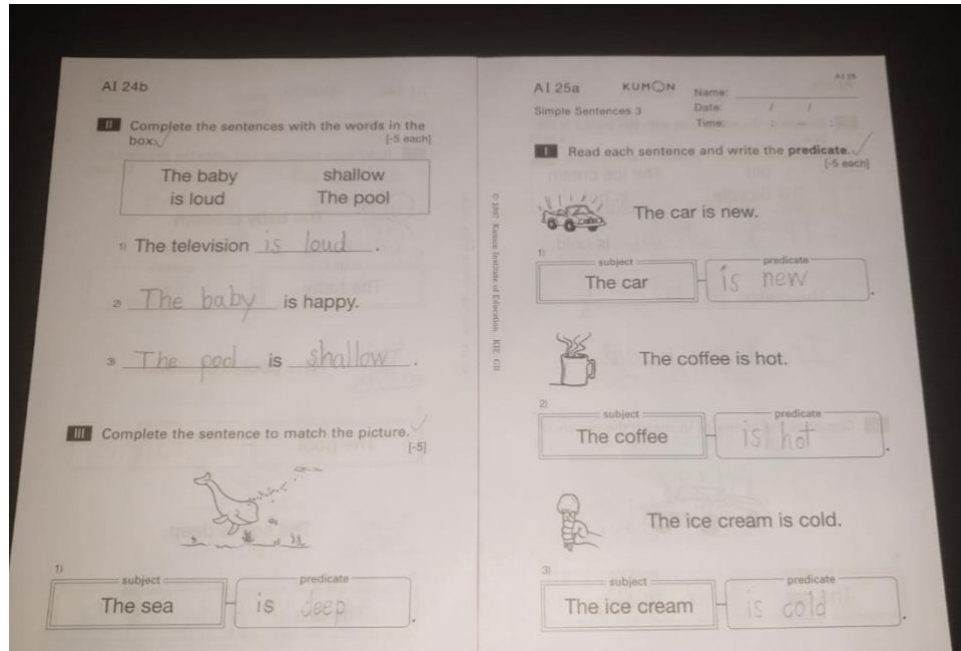

If the students are starting in 7A and not in prep, like Jelena just do one sheet and focus on reviewing alphabets/ sounds.

Asha is happy with the way we are progressing, let's keep up with the good work.

7A-2A is picking up lot of attraction and our centre is identified amongst parents for this section and I really appreciate your hard work and efforts. Thank you.

Class Feedback- 21/10/2019

Eden's Classwork

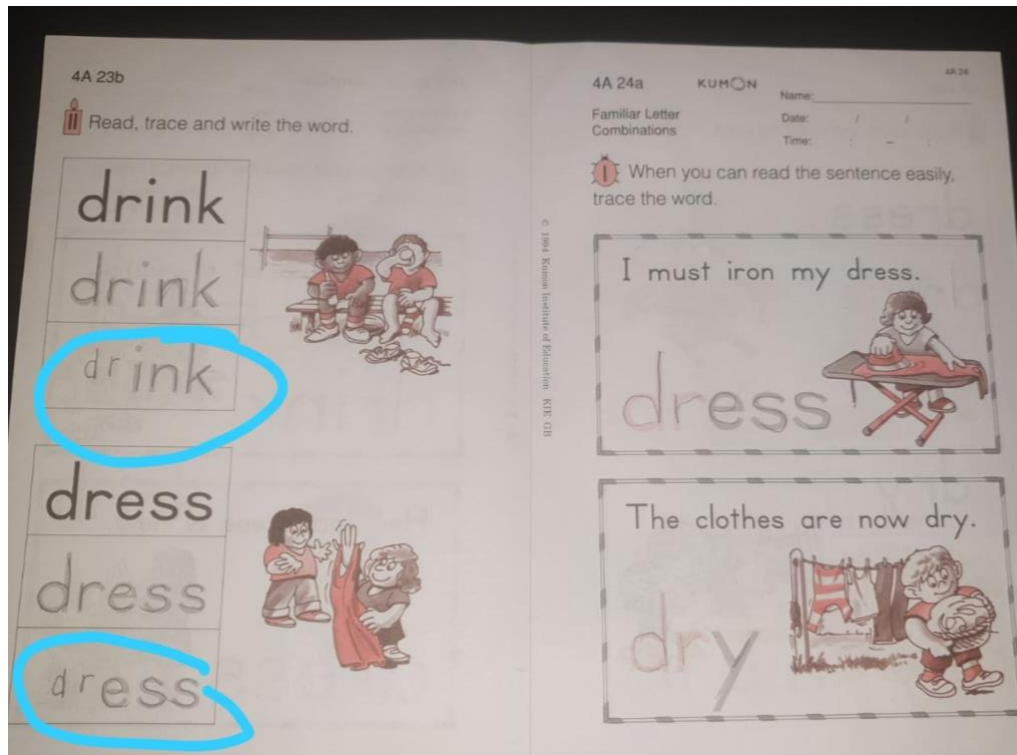

Things to note.

1. Neat handwriting throughout the worksheet
2. Child has read all the instructions

Areas of improvement;

1. Verbally assess him of how well he reads
2. Identify the area of issue, each child might have a different pain point.

Ella's Classwork

Ella has very neat handwriting but seems to not understand the right size. She needs to be taught that in class today.

Please ensure she reads the instructions and underlines the last word. So that it is easier to identify other work skills child needs to work on.

Eason's classwork

2A 64b

Look at the picture **carefully**. Then complete the sentences to match the picture. [-5 each]

1) The cat melts.

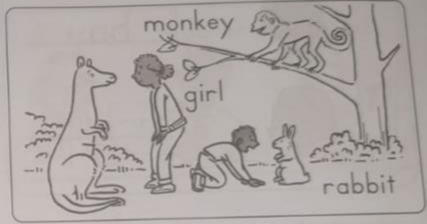

2) The spid bakes.

3) The d cat spills on the table.

2A 65a KUMON Name: _____ Date: ____/____/____ Time: ____:____:____

Function of Words 1 Nouns 1

Look at the picture **carefully**. Then complete the sentences with the words in the picture. [-5 each]

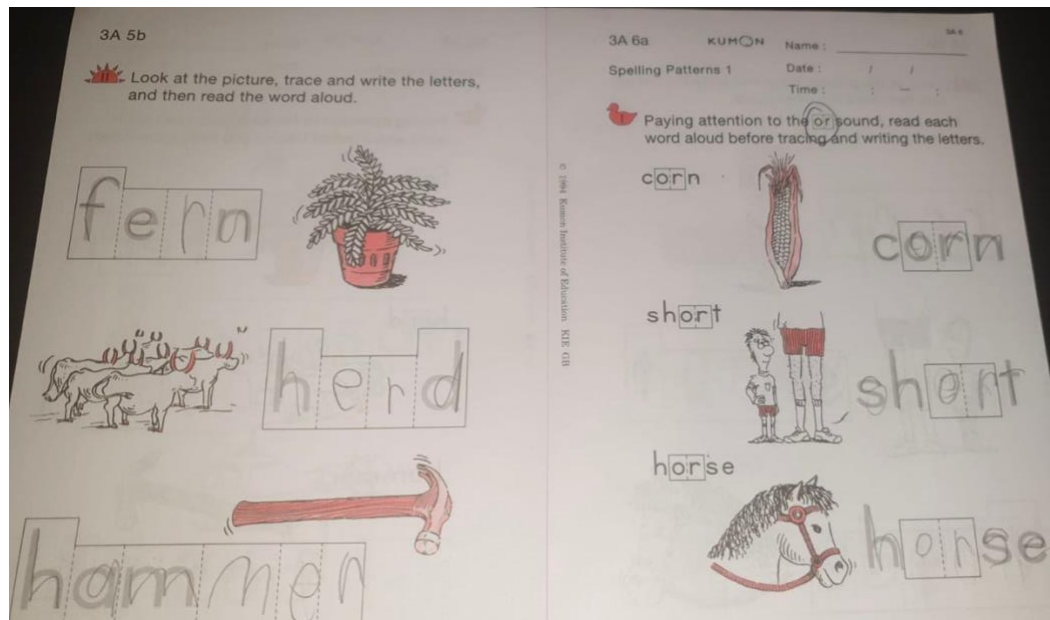

The ¹ girl looks at the kangaroo. The boy looks at the ² monkey. The ³ rabbit is in the tree.

Eason is a one subject student (only does English).

When a child is doing one subject it is a bonus for us to show the parents the impact Kumon could make on their child.

1. Ensure he writes his name, date and time nearly
2. Reads the instructions on all pages and underlines the last word
3. After filling in the missing spaces, ensure he reads the sentence to self-assess if it makes sense.

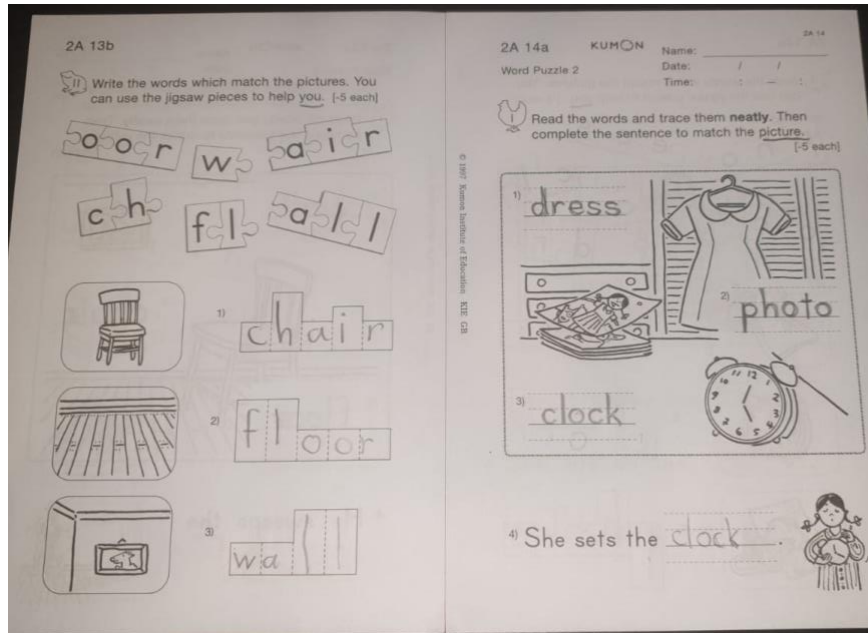

Joshua's Classwork

Joshua definitely needs to improve on his handwriting.
That's the main focus for him now. Also get him started with 2A spelling.

- Make sure he reads all the instructions on all pages and underlines the last word
- The child shouldn't be turning from side a to b, but rather remember what they have written on the previous page.
- Once he has filled in the blanks, he **must** read the words himself to make sense

Piradeesh's classwork

Piradeesh is a model student for our section.

He sets out a practical expectation of what I have in mind for our section.

When he works on the independent table, please observe and emulate from my instructions with the other kids as well.

Dhyaan worked with me last class and he came at 3:40 and left at 4:40 completing both maths and English with 100% accuracy and neatness. Please ensure you continue with the expectation's we've set last class.

Asha has always said that when a child is not able to cope with the program or is bored, it is not an issue with the child but rather a pointer for us to see where we could improve in our instruction. Always keep that in mind and don't hesitate to ask for help.

Krishna,

Saheba

- Verbally assess her today on 7A
- Don't give her tracing worksheets as it is likely to demotivate her and bore her. Remember the zone of proximal development we discussed in our meeting; we'll work on identifying the sweet spot
- I'll set the classwork and homework for her today

Ravneet

- Along with her tracing worksheets, please give her number tracing sheets
- The focus should be on supplementary learning

Shenura

- Model with him how to trace letters with the correct stroke order

Eli

- Model tracing sheets ZII 11 with Eli

Please call me in when Emily comes to class today.
