About Me

I am a highly driven individual, a quick learner who is prepared to work diligently in whatever capacity that may be. I have a versatile skill set and an open mind. On a personal level, my mates know me as an enthusiastic and outgoing person. My passions include piano, guitar, design and surfing.

Education

Mount Scopus Memorial College, Burwood

- 99.30 Atar
- Class of 2020

Monash University, Clayton

- Currently completing a double degree in law and engineering.
- Entering my Fourth year in university with a distinction average across both law and engineering.
- I particularly excelled in Contract Law where I received an 88 and Advanced Engineering Mathematics where I achieved an 83.

Experience:

- **Founder and Chief Editor at *Winki Pop*, 2019-2022**

Having founded Winki Pop Magazine in 2019, I quickly transitioned into the role of chief editor. The publication explores all corners of pop culture, with a focus on music, design, art and surf culture. In my capacity as CE, I learned important team management and leadership skills. Furthermore, I learned valuable business skills as I led the organisation's financial operations and looked after distribution for two years.

The company is currently undergoing an expansion. Winki Pop will be separated into two divisions as of the first of January 2023; Winki Pop Publications and Winki Pop Events. While our publications team will continue to focus on the latest and greatest in music, design, art and surf, our events team will deliver imaginative in-person experiences, from fashion and design shows to intimate live music sessions featuring emerging artists.

- **Maths and English tutoring, 2019–2023**

Offering high quality teaching services to students of all ages, up to VCE/HSC. With a background in law, I help students to convey their ideas concisely and accurately. Drawing on my engineering skills, I teach students to deal with complex mathematical problems in a timely manner; anywhere from calculus to data analytics.

- **Work Experience at Minter-Ellison Lawyers, 2021**

In completing a summer internship at Minter Ellison Lawyers, I gained valuable communication skills, as I learned to draft legal advice and contractual instruments.

- **Accounts payable team at Chemist Warehouse, 2023**

Gaining hands-on experience in the financial industry, I learned to navigate financial statements and gained an understanding of large-scale cash flow. My time at Chemist Warehouse provided important insight into the accounting world, and I am eager to apply my knowledge to future endeavours.

- **Support worker, 2021–2022**

As part of the National Disability Insurance Scheme, I have worked with adults with special needs, helping them to achieve their life-goals, be it securing work or completing their tertiary education.

- **Agricultural Volunteering, 2024**

Volunteering in agriculture this summer was an incredibly rewarding experience. Spending time outdoors amidst the orchards, I learned firsthand about the intricacies of fruit cultivation and harvesting. It was fulfilling to contribute to the agricultural process while connecting with nature and supporting the agricultural industry.

Skills:

- Fast Learner and quick thinker
- Written Skills
- Analytical ability
- Research skills
- Mathematical skills
- Organisational skills
- Interpersonal skills
- Creative and musical skills
